Let's go to Japan and change your life

Supporting part-time work opportunities among students.

The city of Amagasaki is a very convenient place, just outside of Osaka and between Kobe and Kyoto. With low rents and many small businesses nearby it is very easy to live and shop here.

The cost of living in Amagasaki is among the lowest of the region. All around there are signs of reform and development. I am, therefore, planning a region project with talented international students to revitalize the region. I think that if international students and local residents live and work together it will be mutually beneficial. It will help Amagasaki play a more important role on the world stage. I hope you will come join us in this project. While acquiring Japanese language skills you will also be participating in the opening up of Amagasaki to the world.
